(54) Title: RESERVOIRS FOR BOTTLED LIQUID DISPENSERS

(57) Abstract: A thermally-insulated reservoir (9) for a dispenser in which liquid is supplied from a bottle to a discharge outlet via a reservoir, has an inner wall (23) and an outer wall (24) defining a sealed and evacuated heat-insulating cavity (30) at least partially surrounding a liquid space (22). In one application of the invention the reservoir takes the form of a cooling vessel with the thermal means provided by a cooling coil (26). The invention may also be applied to reservoirs which form a hot tank with the thermal means provided by an electrical heating element.
